Smart Pharma

Smart Pharma is a completely customizable platform that allows pharmacies optimize and automate their daily tasks involving medicines delivery.

The system is designed to speed up simple tasks that is needed to perform this service, like:
- order of medicines made by customers
- order of medicines from suppliers
- contacting third parties delivery companies
- contact minister of healthcare

The pharmacy can decide which medicine to sell, adding them to the platform.

The platform can be easily accessed by customers of the pharmacy from the web or from the mobile application.

Customers can use the platform to order medicines directly at home, avoiding boring queues at the pharmacy

To use the platform, the customer must create an account. The required personal information are:
- Name
- Lastname
- Codice fiscale
- Residence

Additional information are:
- Payment method
- Family doctor, in order to automate the receipt of medicines

All the information provided are going to be used only for payments and to trace purchases of medicines in case of investigation from the authorities.
